YARN DYEING

Established in 2019, Sarena Textile's Yarn-Dyeing Division combines state-of-the-art Italian technology with expert craftsmanship to deliver high-performance, color-consistent yarns.

- Equipped with advanced Italian machinery and automated process controls for precision.
- Processes cotton, spandex, PC, CVC, and polyamide blends.
- Expert in yarn dyeing with Reactive, VAT, and Disperse dyeing.

WEAVING

Since 2014, Sarena Textile's Smart Textiles Division has led innovation in high-performance fabrics, ensuring precision, durability, and global quality standards from fiber to fabric. Through expert quality checks, we guarantee timely delivery based on customer demand.

- Strict compliance with international standards ensures customer satisfaction and consistency
- Weaves: Plain, Twill, Satin, Dobby, Broken Twill, BFC, Canvas, Ripstop, Cross Twill
- Weights: 4.5 oz – 13.50 oz

DYEING & FINISHING

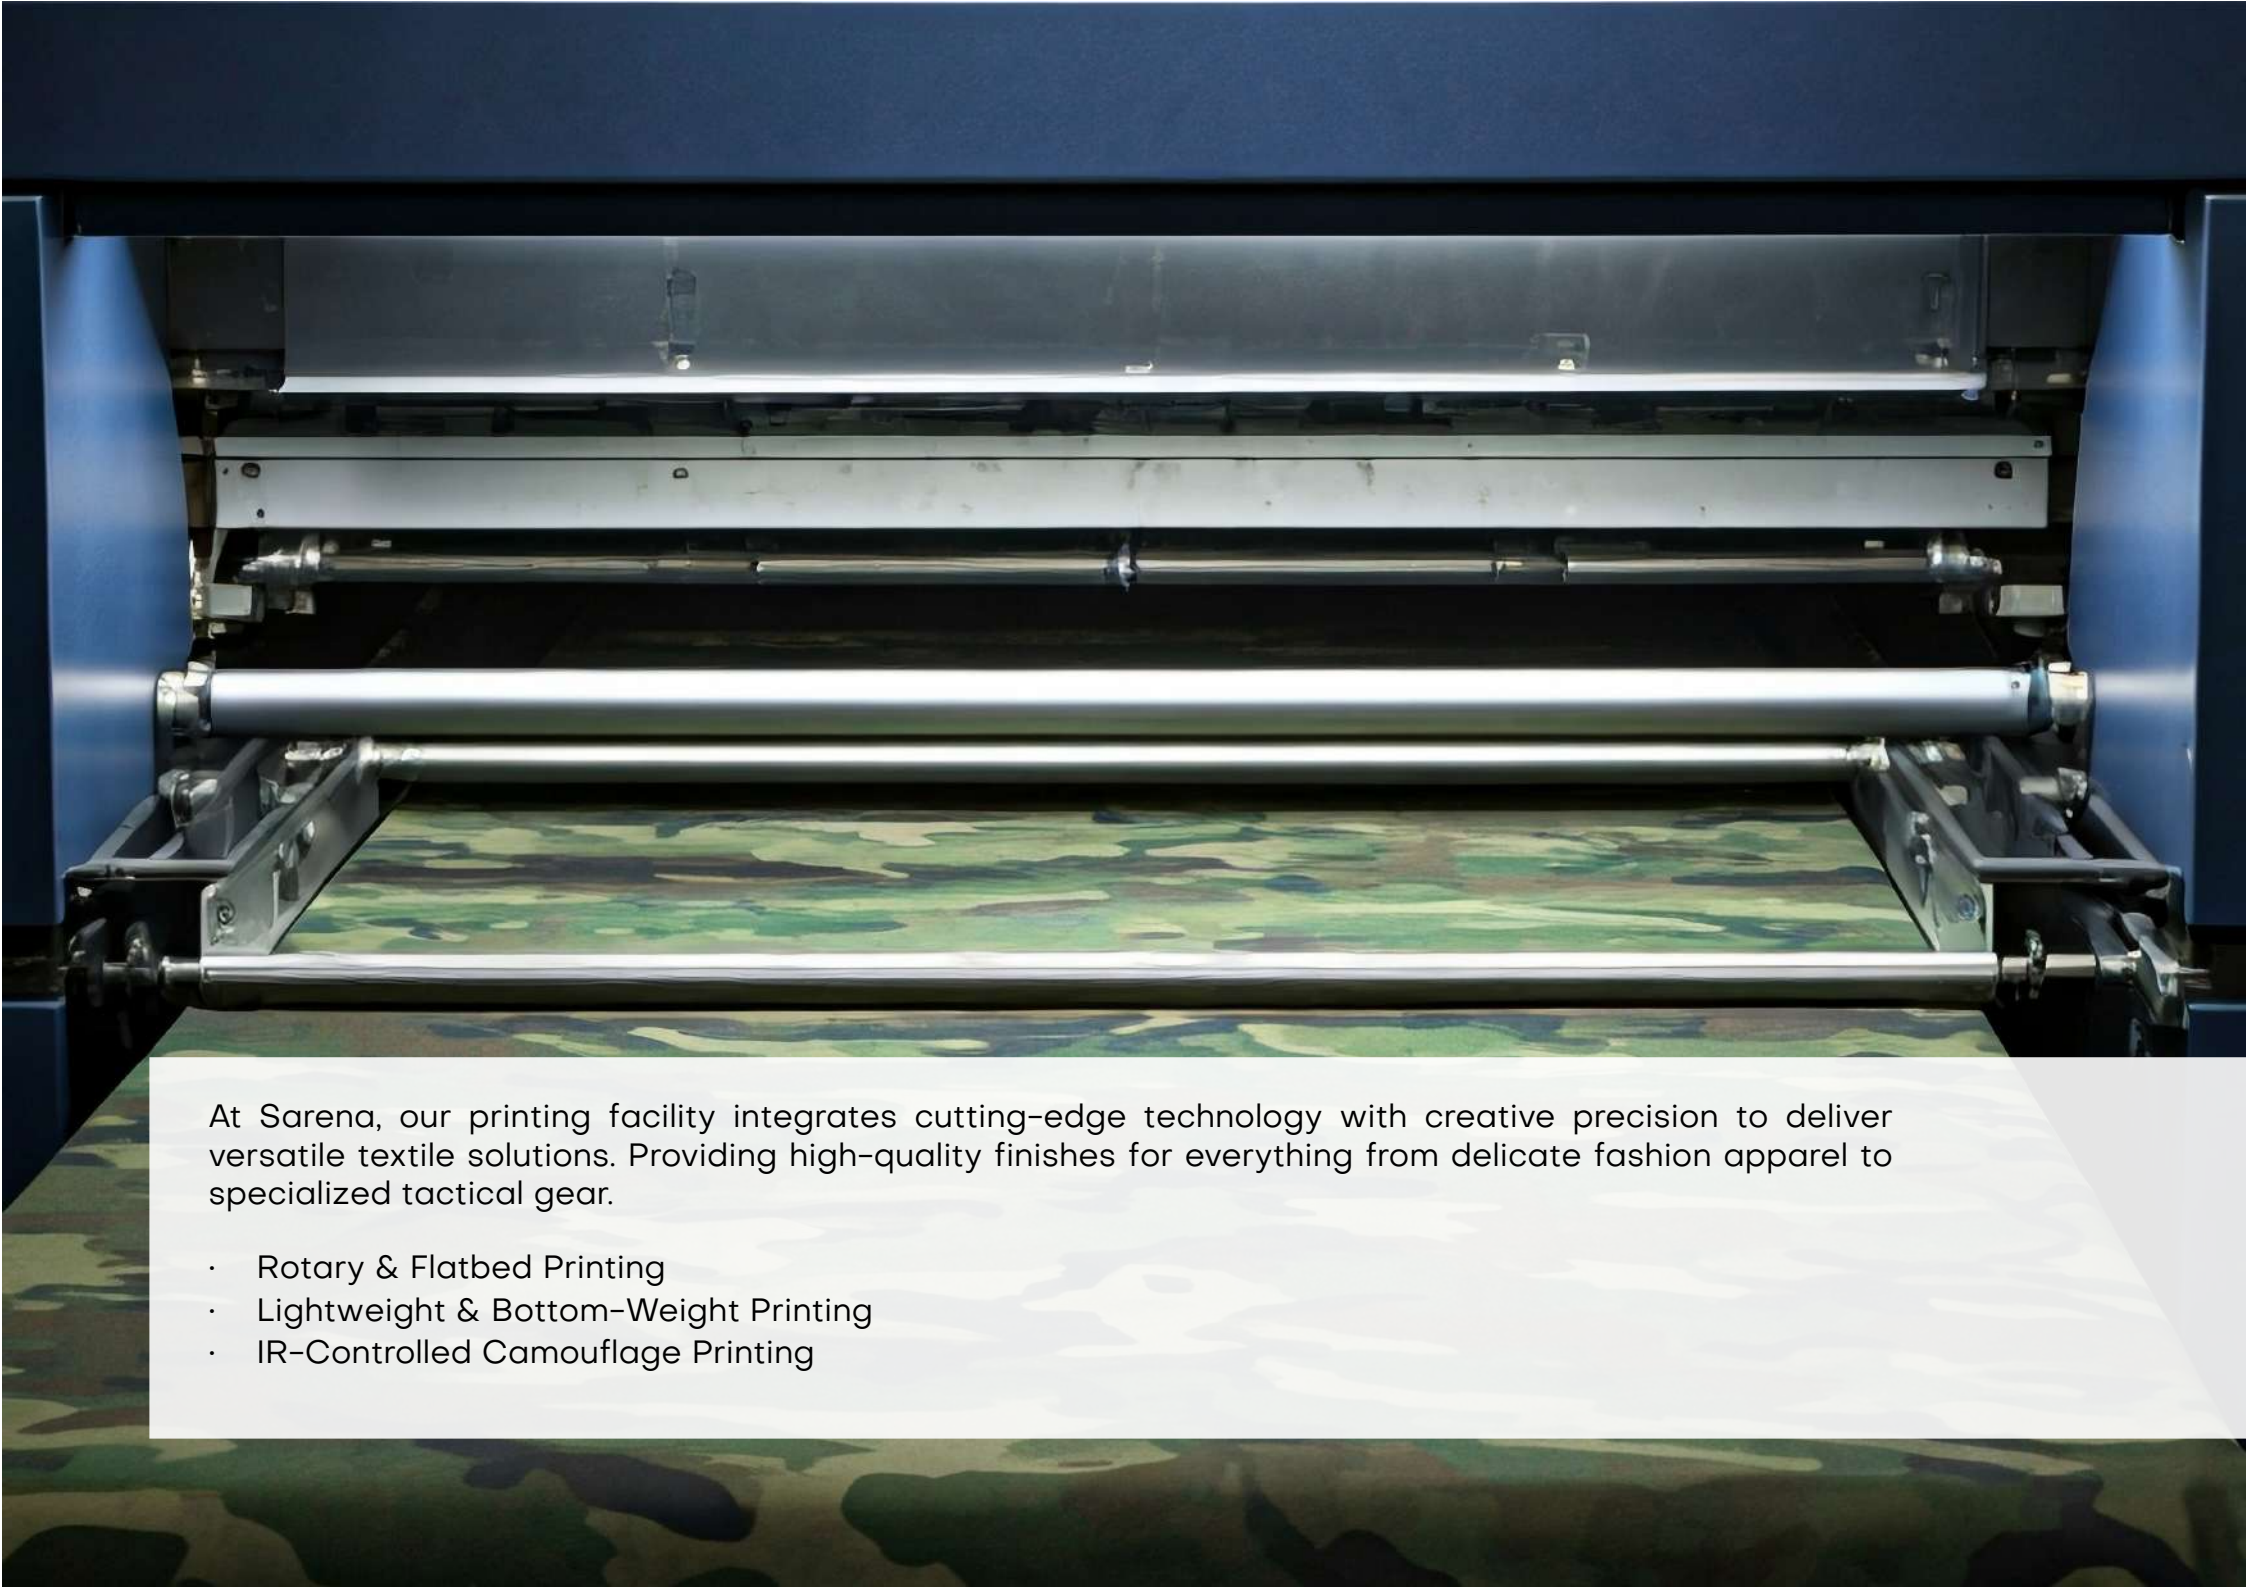

Sarena Dyeing & Finishing, established in 1999, is a leader in advanced textile processing, combining precision engineering with European technology. This facility processes all kinds of fabrics, including cotton, Polyester cotton, and Aramids, Our in-house R&D and QC labs drive innovation and ensures compliance with customer requirements.

We offer technical finishes such as:

- High-Visibility (High-Vis) Solutions
- Flame-Resistant (FR) Treatment
- Chemical Protection
- UV Protection
- Coating & PFAS-Certified Products
- Anti-Static
- Antimicrobial
- Stain Release

PRINTING

At Sarena, our printing facility integrates cutting-edge technology with creative precision to deliver versatile textile solutions. Providing high-quality finishes for everything from delicate fashion apparel to specialized tactical gear.

- Rotary & Flatbed Printing
- Lightweight & Bottom-Weight Printing
- IR-Controlled Camouflage Printing

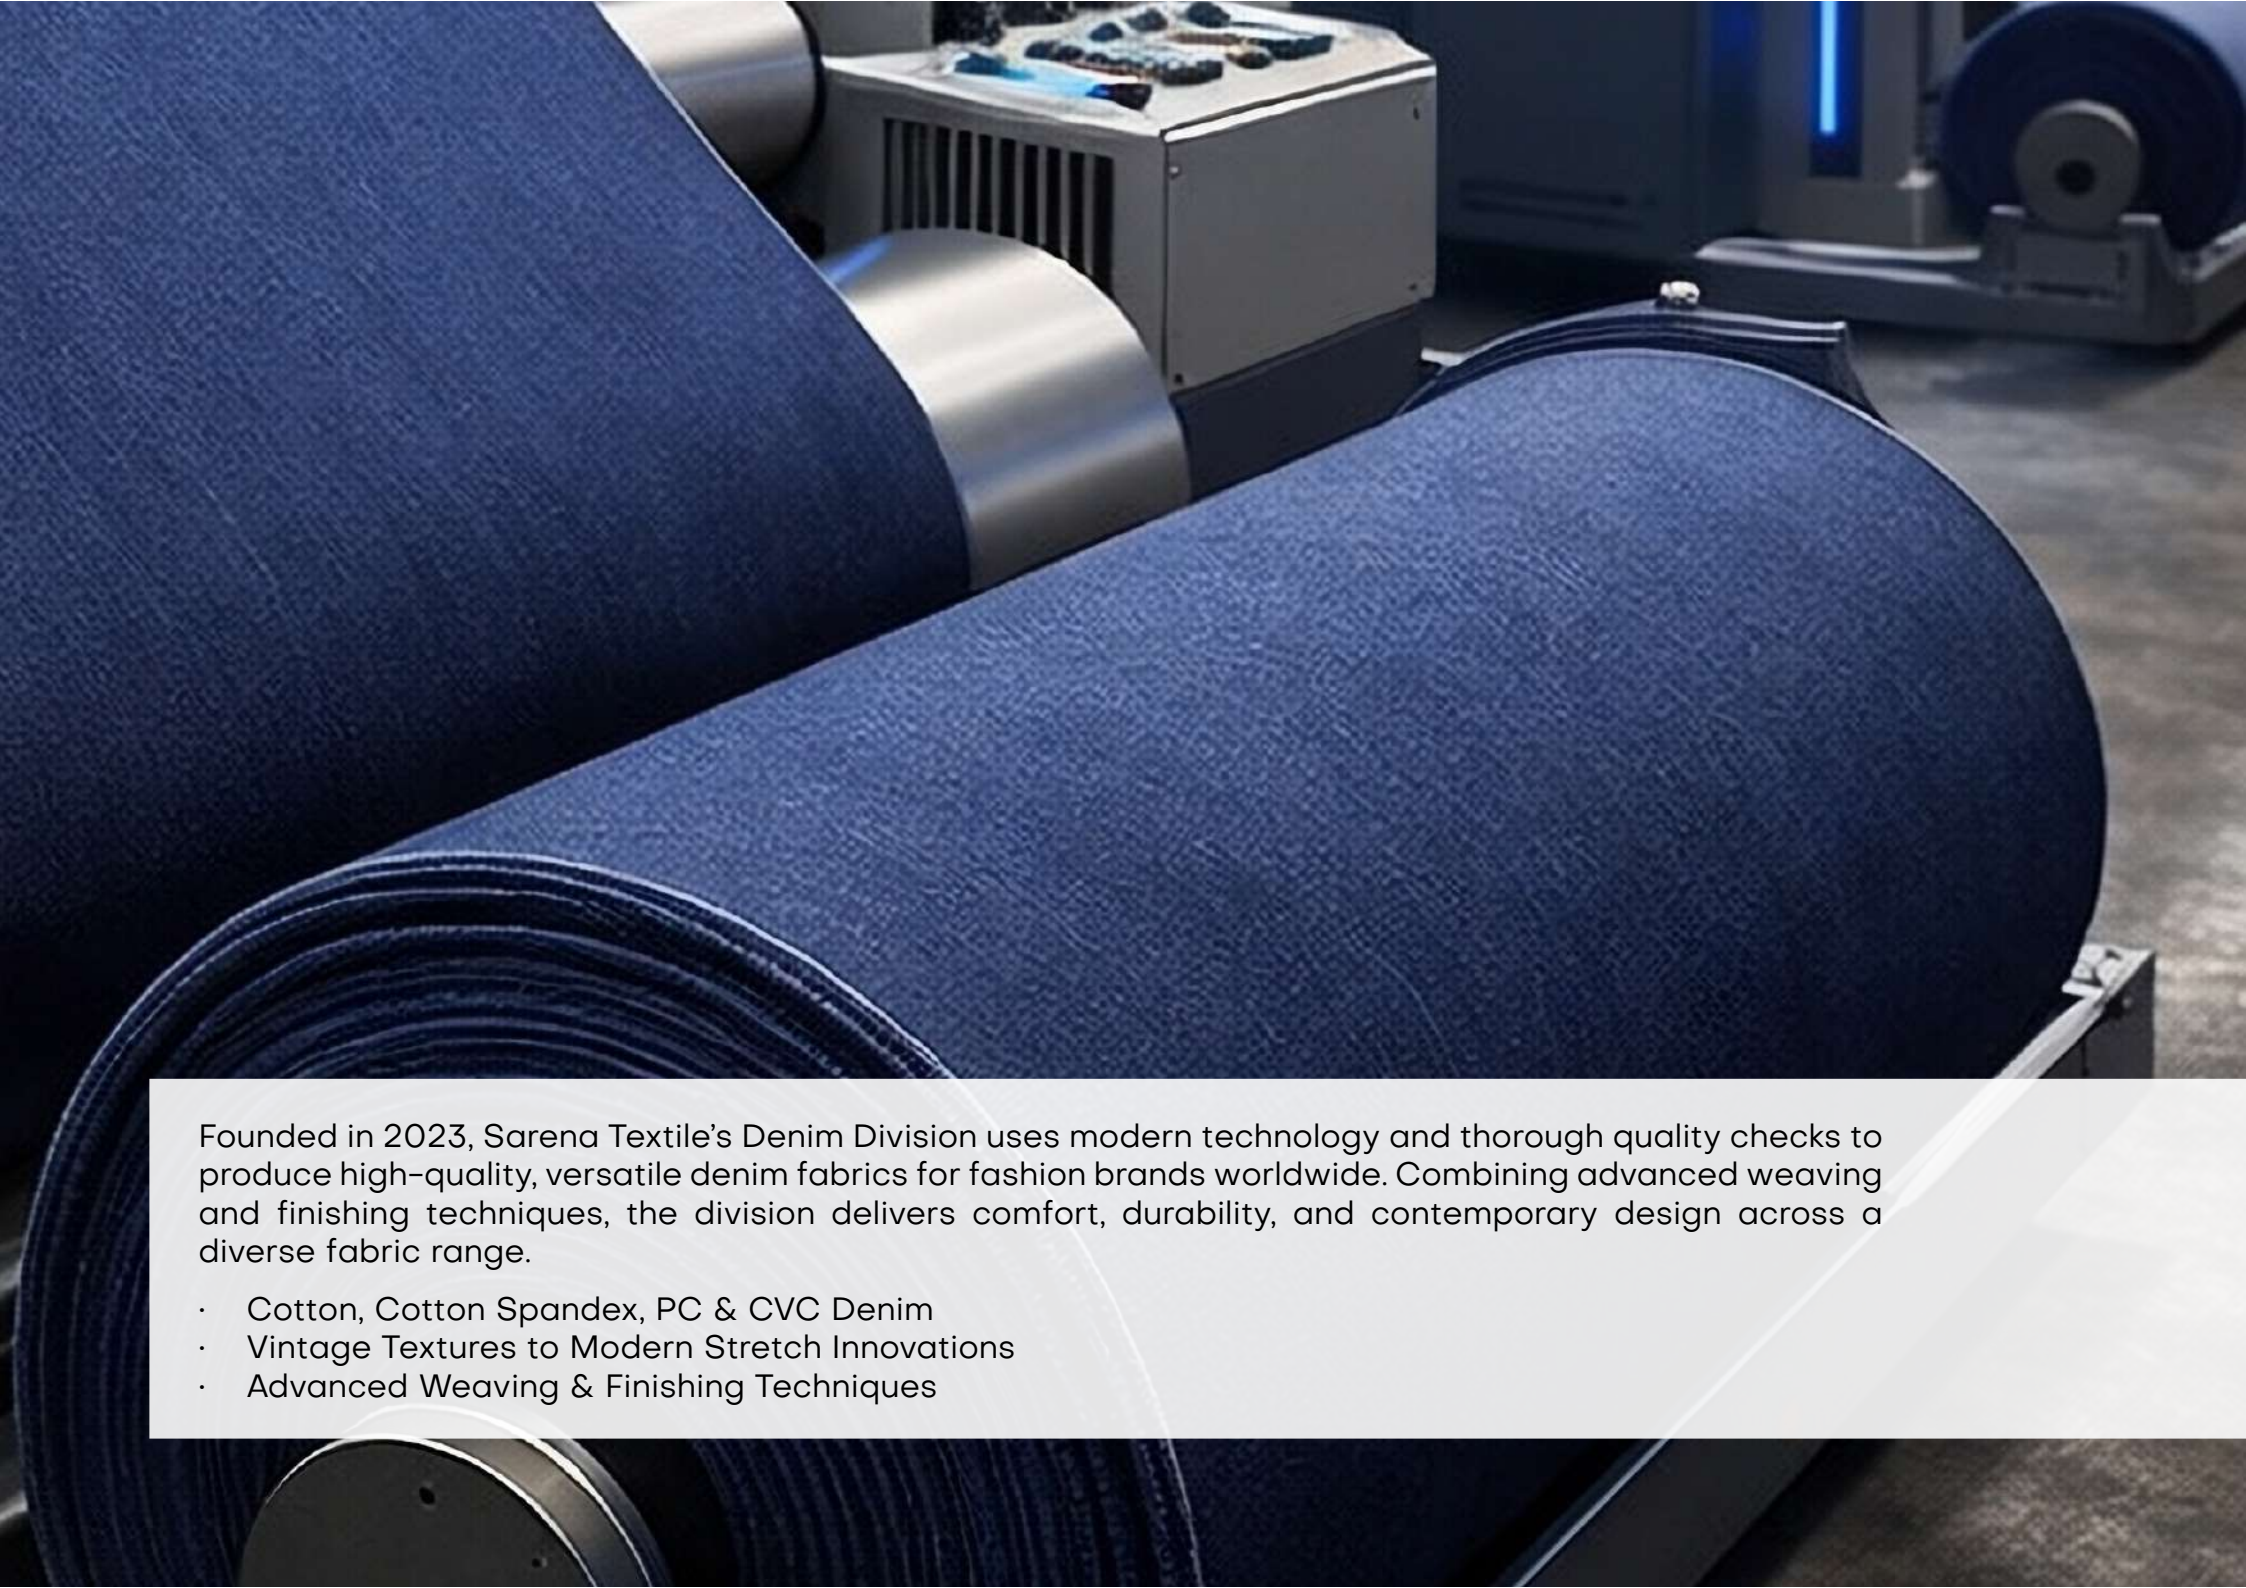

SARENA
TEXTILE INDUSTRIES

DENIM

A close-up, high-angle shot of a large industrial denim processing machine. The machine features several large, polished metal rollers and a complex mechanical assembly. A control panel with a keypad and a red emergency stop button is visible in the upper left. The machine is illuminated with dramatic blue and white lights, highlighting its metallic surfaces and mechanical components.

A large roll of dark blue denim fabric is the central focus, showing a fine, consistent weave. It is positioned in a factory environment, with industrial machinery visible in the background. The lighting is soft, highlighting the texture of the fabric. A semi-transparent white box with a diagonal line is overlaid on the bottom right of the image, containing text and a bulleted list.

Founded in 2023, Sarena Textile's Denim Division uses modern technology and thorough quality checks to produce high-quality, versatile denim fabrics for fashion brands worldwide. Combining advanced weaving and finishing techniques, the division delivers comfort, durability, and contemporary design across a diverse fabric range.

- Cotton, Cotton Spandex, PC & CVC Denim
- Vintage Textures to Modern Stretch Innovations
- Advanced Weaving & Finishing Techniques

APPAREL / GARMENT UNIT

Sarena Apparel, established in 2013, is a leading garment manufacturer recognized for innovation, reliability, and sustainability. From our state-of-the-art facility, we deliver high-quality fashion wear, workwear, and specialized textiles to global clients. With expertise in flame-retardant fabrics, advanced denim processing, and technical apparel, we ensure durability, performance, and precision. Backed by modern production systems and ethical practices, Sarena remains a trusted partner for industrial and institutional wear.

- Process Automation with Auto Cutters & advanced hanger system
- Stringent Quality Checks
- Diverse Product Capabilities including: PPE, Outerwear, Institutional Products, Sleeping Bags, Rucksacks, and Accessories

OUR PRODUCTS

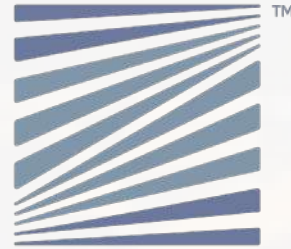

PRODUCTS

We offer an array of denim and non-denim woven products equally for casual and performance wear. Our operations include all parts of the conversion process from yarn dyeing on to weaving, dyeing and printing (additionally for denim), garment manufacturing and finishing. Production is supported by our **ISO-17025** in-house chemical and quality laboratories.

Some of our most popular products include;

- Industrial Laundry **ISO-15797** products for the US market.
- Industrial laundry for European market.
- Textured fabric and yarn dyeing.
- Premium shirting fabric.
- PFAS compliant finishes.
- Printed fabrics.
- Outerwear garments for fashion or military use.
- Sleeping bags, rucksacks, bags and munition belts for military.
- Caps and Hats.
- Multifunctional products
 - o A range of performance finishes such as FR, anti-static, chemical repellent, mosquito repellent, breathable and wrinkle free products.
 - o IR controlled camouflage prints for military use.
 - o ISO and EN certified Hi Visibility products.
 - o Performance coatings.
 - o Inherent FR garments.
 - o Proban® treated FR fabrics and garments

A range of accompanying product certifications are available for both the US and European markets

Corporate Values

GOOD HEALTH & WELLBEING

Sarena Textile Industries operates an in-house clinic to provide basic medical facilities to its employees.

GENDER EQUALITY

Our commitment extends to empowering by including all members of society through inclusivity & cutting-edge training school.

CLEAN WATER

2,395,000+ liters of clean drinking water provided to 250,000+ individuals across 54 previously deprived communities.

AFFORDABLE & CLEAN ENERGY

Our green initiatives prioritize energy and water conservation through efficient systems, renewable sources, and responsible consumption, contributing to a sustainable future.

DECENT WORK & ECONOMIC GROWTH

Sarena Textile Industries provides a decent work environment for its workers, offering all legally mandated holidays, leaves, benefits, and bonuses.

INDUSTRY INNOVATION & INFRASTRUCTURE

We have installed innovative technologies in our systems, including Programmable Logic Controls (PLCs) and Variable Frequency Drives (VFDs) on production machines.

RESPONSIBLE CONSUMPTION & PRODUCTION

A responsible supply chain involves by meeting standards of GOTS, GRS, RCS OCS and environmental sustainability throughout the entire production and distribution process, ultimately contributing to a more sustainable and socially responsible business operation.

LIFE ON LAND

We are actively planting trees and reducing greenhouse gas emissions from our systems through energy-efficient practices. These efforts are contributing to the improvement of life on land.

Focus on **Sustainability**

An aerial photograph of a large industrial facility, likely a textile mill, featuring several large, interconnected buildings with corrugated metal roofs. Two prominent tall smokestacks are visible, and various pipes and structural elements are scattered throughout the site. The background shows some greenery and other smaller buildings.

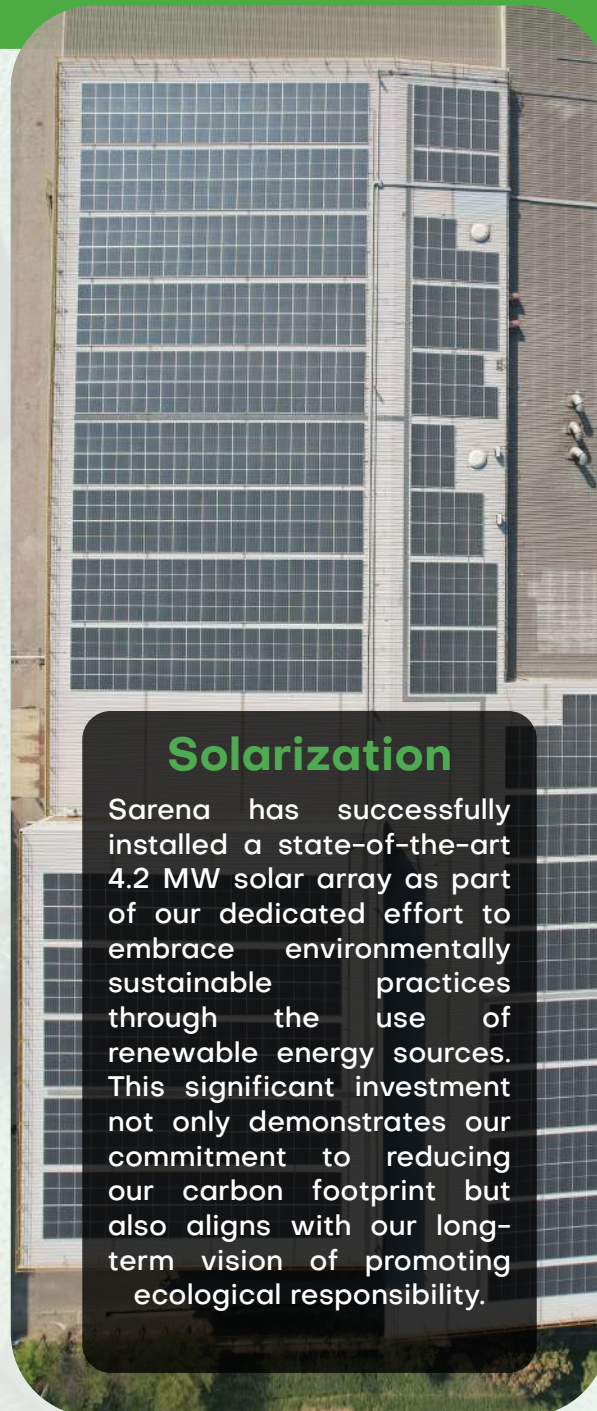

Bio Fuels

As part of our commitment to a greener future, Sarena has transitioned to renewable energy through our advanced biomass-fed boilers. By repurposing agricultural by-products such as sugarcane and rice waste, we are significantly reducing our carbon footprint and promoting a circular economy within the textile industry.

Sarena 360

Sarena 360 is a sustainability initiative connected to our desire to promote the circular economy. By adopting strategies such as designing products for durability and reparability, using recycled and renewable materials, and implementing closed-loop production and recycling systems, We can reduce the environmental impact of our production processes.

Solarization

Sarena has successfully installed a state-of-the-art 4.2 MW solar array as part of our dedicated effort to embrace environmentally sustainable practices through the use of renewable energy sources. This significant investment not only demonstrates our commitment to reducing our carbon footprint but also aligns with our long-term vision of promoting ecological responsibility.

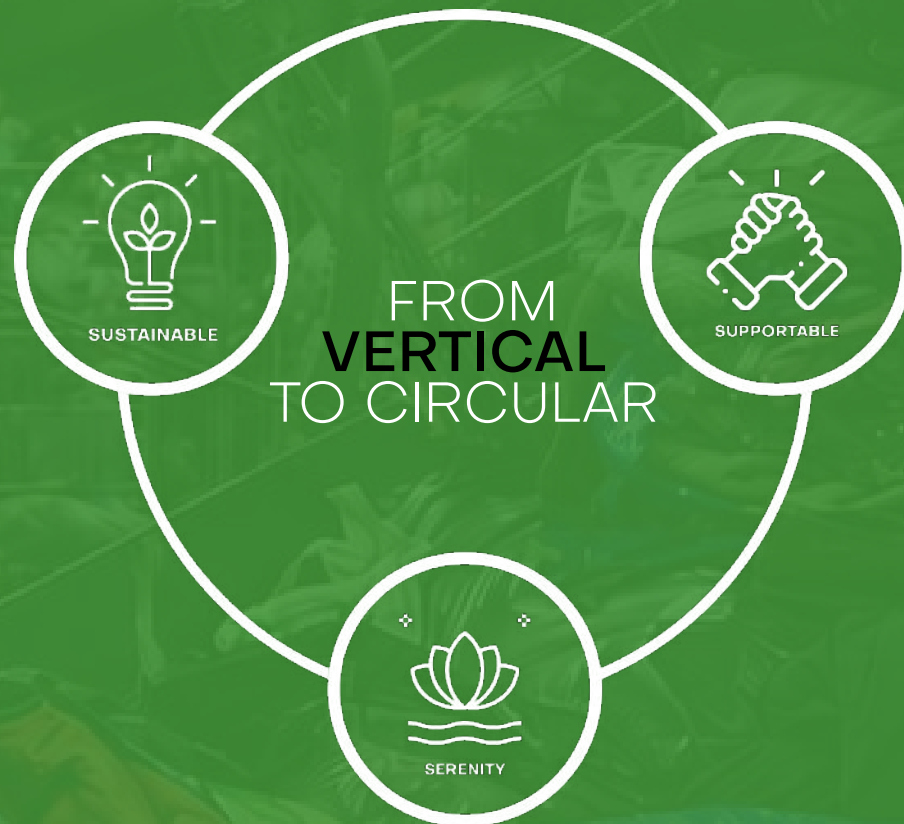

Water Treatment Plant

Our onsite Biological Water Treatment Plant is designed to treat and purify water, boasting with a capacity of 160 cubic meters per hour, which translates to an amount of 160,000 liters of water processed every hour. This process ensure the water is not only clean and safe but also suitable for the sustainability of aquatic ecosystems.

The background image shows a person from behind, wearing a dark long-sleeved shirt, working in a textile factory. They are standing near a conveyor belt or work area with various fabrics and equipment. The scene is dimly lit, with some overhead lights visible. The logo 'SARENA 360°' is overlaid in the center. 'SARENA' is in white, and '360°' is in green. There are also green geometric shapes in the top-left and bottom-right corners.

SARENA 360°

Textile Industries (Pvt.) Ltd

Sarena 360 is a sustainability initiative connected to our desire to promote the circular economy. By adopting strategies such as designing products for durability and reparability, Using recycled and renewable materials, and implementing closed-loop production and recycling systems, We can reduce the environmental impact of our production process.
